

31) Normal distribution \rightarrow Same qs solved in college exams.

32) " " " " " " " " " "

33) 

33) no of students $N = 500$

mean, $\mu = 65$; std dev (σ) = 5

(9) i. ~~$\phi(x_0)$~~ ~~$\phi(70)$~~ ~~$x = 5$~~ ~~$y = 70 - 65$~~

(a) $\therefore P(X > 70) ; z = \frac{X - \mu}{\sigma} = \frac{70 - 65}{5} = 1$

$$\Rightarrow P(Z > 1) = 1 - P(Z < 1) = 1 - 0.8413$$

$$= 0.1587 \text{ — Ans}$$

(b) $\therefore P(60 \leq X \leq 70)$; $Z_1 = \frac{X_1 - \mu}{\sigma} = \frac{60 - 65}{5} = -1$

$$Z_2 = \frac{X_2 - \mu}{\sigma} = \frac{40 - 65}{5} = -5$$

$$\Rightarrow P(-1 \leq Z \leq 1) = P(Z \leq 1) - P(Z \leq -1)$$

$$= 0.8413 - 0.1587 = 0.6826$$

\therefore

No	of	students	=	$500 \times 0.1587 = 79$	} <u>Ans.</u>
"	"	"	=	$500 \times 0.6826 = 341$	

34) Don't know about statistical hypothesis.
